 REGISTRATION CLOSES NOVEMBER 5

The Back Saver System is a new comprehensive approach shown to reduce the most expensive issue in the workplace; back pain. This course, taught by Peter Guske PT will give an immediately usable tools that are proven to relieve back pain immediately, showing attendees how to put their “back in” after they have “put their back out” The overwhelming share of all the expenses for an employer’s healthcare goes to no more than 3 conditions: 1. Spinal Pain (lower back pain), 2. Fatigue/Diabetes, and 3. Heart Disease/Hypertension/Hi-Cholesterol/Overweight. Using a highly-unique, lively and innovative demonstrations Peter will introduce his unique methods that have been proven to decrease healthcare cost.

Objectives:

- Understand the rationale for performing internal body leveraging and can perform new, unique self-mobilization.
- Explain exactly what is happening inside the spine and why traditional educational programs, aimed at reducing the incidence of back injuries on the job, have been largely ineffective.
- Utilize new demonstrated instruction techniques that allow you to approach back pain in a much more direct, accurate and time efficient manner in any work setting.
